

September 2017 Engineering Committee Minutes

Welcome and Introductions – Hand around the **Contact sheet**. You are appreciated ones. Please let us know how we can contact you.

Facilitator – Tom Hood

Minutes – Tom Hood

Kudos – Abe Conway.

Big Pipe STL Status – Status and options. Phil -

Telos Phone Patch in Air Room – The Telos seems to be functioning well.

P1 Losing Connection with Audio Card – We have found a software conflict in the P1 PC which makes it lose it's sound card, which makes it impossible to record audio. It is the Dragon Naturally Speaking visibility software which is creating the conflict. Our solution is to put another Windows workstation in P1 with a KVM switch. This will put Dragon on a separate operating system which will not have a conflict with the primary workstation.

Air Room Projects – Still Pending - Additional Aux In project. Needs fabrication and install. Logical fader location on air console has been identified.

The talent pod for Mic 3 had died. No headphone output. Devin will check it out.

Remote Broadcast Training – Sign up for a hands on training session with our remote broadcast gear.
